**TN to become hub for seaweed industry**

Chennai, Sep 20 (IANS) Tamil Nadu (TN) will become a seaweed industry hub for investment, says the state government. It is an initiative to attract investment in the seaweed industry, which is a major export for the state.

The government is planning to set up a seaweed processing unit in the state, which will be a major step towards the development of the seaweed industry in the state.

**indus** "We are creating a strong opportunity for the investors and entrepreneurs to make Tamil Nadu a strategic destination for the enhanced sector," he said.

The two-day conference is organized by the Tamil Nadu Chamber of Commerce and Industry (TNCCI) and the Tamil Nadu Industrial Development Corporation (TNIDC).

The government will also continue to work to improve the global future, by promoting a sustainable and equitable world for all.

The same behavioral effects are also seen when there are changes in the way the decision-making process is carried out. For example, asking decision-makers to make a decision in a group rather than alone can lead to a change in the decision. This is because the group process can lead to a change in the way the decision is made. For example, a group of people may be more likely to make a decision that is consistent with the majority than a single person. This is because the group process can lead to a change in the way the decision is made. For example, a group of people may be more likely to make a decision that is consistent with the majority than a single person.

## Marine scientists call for blending technology with indigenous knowledge

By Anand ...

Goa: Marine scientists and experts from across the globe have called for blending technological innovations with indigenous traditional knowledge in respect to fisheries to improve livelihood of fishermen. They were speaking at a panel discussion on future proofing of small scale fisheries on the sidelines of the ongoing International Symposium on Innovations in Fishing Technology, here on Tuesday.

Referring to major challenges in the small-scale fisheries (SSF), John Lavery, Fisheries Industry Officer of the Food and Agriculture Organization of the UN said industry appropriate technologies are significant to improve income level to be developed to enhance the contribution of fishing to food security.

"Innovative innovations are crucial to meet a set of targets such as sustaining production in coastal waters, mitigating climate change, reducing environmental impact, reducing conflict among multiple users of coastal zones, restoring coastal habitats and ensuring value chain. It is essential to combine knowledge of traditional knowledge, thereby utilization of age-old indigenous traditional knowledge technology innovations, thereby utilization of age-old indigenous traditional knowledge technology innovations in different locations as much as possible is utmost important in opening SSF and

environmental organizations both have to deal with the pressure

logical and policy innovations such as deep-sea fishing, netting, and deployment of artificial reefs are necessary to feed.

ing organized by the Bay of Bengal Programme International (BOBP-ICCI), the National Fisheries Development Council of Agricultural Research (ICAR), and National Institute of the 23rd annual meeting of the International Council for the Exploration of the Sea (ICES) -FAO Joint Working Group on Fish Behaviour (ICES-FAO WGTBF).

From 30 countries, the 5-day event will witness over 1000 participants. The event will witness over various themes such as active fishing gear, passive fishing gear, etc.

## India proposes a virtual marine fisheries academy

Kochi, Feb 14 (IANS) Top experts in the fisheries sector, who are currently taking part in a global symposium here, pitched for the development of a regional marine fisheries platform for the Bay of Bengal region to deal with the issues in the sector, while India proposed the establishment of a regional fisheries academy for the region.

On February 14th, 2023, representatives of the littoral countries of the region. The event, hosted by the BOBP-IGO and the Government of India, Shri Jatindra Nath Swain, IAS, Additional Secretary (Fisheries) at the Indian Council of Agricultural Research, Venu Rajamony, Officer on Special Duty, External Cooperation, Setting the context, Dr. P Krishnan, Director, BOBP-IGO highlighted the nature of the issues facing the region to highlight the need for a regional platform for the development of a regional marine fisheries platform for the Bay of Bengal region, held on the sidelines of the ongoing global symposium on 'Innovations in Fishing Technologies for Sustainable and Resilient Fisheries' here, the experts stressed the need for a long-term institutional platform to deal with the issues in the sector.

During the meeting, participating countries including India, Bangladesh, Malaysia, Myanmar, Sri Lanka and Thailand presented their views on the development of a regional marine fisheries platform for the Bay of Bengal region, held on the sidelines of the ongoing global symposium on 'Innovations in Fishing Technologies for Sustainable and Resilient Fisheries' here, the experts stressed the need for a long-term institutional platform to deal with the issues in the sector.

In support of these efforts, the group urged littoral states to strengthen marine education. They also called on the international community to contribute to the development of the region.

Kochi: Amid rising concerns over a series of challenges, including climate change, posing threats to the fisheries sector globally, a panel of experts has proposed stronger research collaboration among the littoral countries of the Bay of Bengal for the betterment of marine wealth and livelihood of small-scale fishers in the region.

Speaking at a dialogue on the development of a regional marine fisheries platform for the Bay of Bengal region, held on the sidelines of the ongoing global symposium on 'Innovations in Fishing Technologies for Sustainable and Resilient Fisheries' here, the experts stressed the need for a long-term institutional platform to deal with the issues in the sector.

## Marine scientists call for blending technology with indigenous knowledge

© 2008 Blackwell Publishing Ltd

Fauna Marine scientists and experts from across the globe have called for blending technological innovations with indigenous traditional knowledge in respective regions to improve livelihood of fishermen. They were speaking at a panel discussion on future proofing of small scale fisheries in the sidelines of the ongoing international symposium on innovations in fishing technology, here on Thursday.

Referring to major challenges in the small-scale fisheries (SSF), John Lomboy, Fishery Industry Officer of the Food and Agriculture Organisation of the UN said culturally appropriate technologies significant to respective regions need to be developed to enhance the contribution of fishing to food security.

However innovations are crucial to meet a set of targets such as sustaining production in coastal waters, mitigating climate change, developing mariculture, reducing conflict among multiple users of coastal waters, tackling trade barriers and developing value chain. In addition to scientific and technological innovations, effective utilization of age-old indigenous traditional knowledge existing in different localities as much as possible is utmost important to develop SIF and improve livelihood of traditional fishers", said Lander.

Dr P. Krishnan, director of the Bay of Bengal Programme Inter Governmental Organisation said modernising the small-scale fisheries sector is the need of the hour, to deal with the concerns such as low productivity, low price realisation and labour issues.

# 'Modernizing small-scale fisheries sector crucial'

Times News Network

Kochi: A panel discussion on future proofing of small-scale fisheries was held here on Thursday as part of the ongoing international symposium on innovations in fishing technology, organized by the Bay of Bengal programme (BoBP) and other organizations.

Experts suggested that blending technological innovations with indigenous traditional knowledge in respective regions could help improve the livelihood of fishermen.

"Relevant innovations are crucial to meet a set of targets such as sustaining fisheries in coastal waters," BoBP director said.

INT'L FISHERIES

...ers, mitigation, change, development, among small-scale coastal zones barriers and the chain," BoBP director said.

## Sea levels: Committed to greening marine fisheries says Centre

Secretary to the Department of Fisheries, Government of India committed to make plans to address climate change and greening the marine fisheries sector to ensure that the fish for sustainability.

Kochi: In the wake of the rise in sea surface temperature and level, the Centre has signalled making ambitious deliberations on greening the marine fisheries sector.

Kochi: In the wake of the rise in sea surface temperature and level, the Centre has signalled making ambitious deliberations on greening the marine fisheries sector.

"The country would go for appropriate innovative technologies required for the carbonisation of the sector," said Mehra while speaking at a session on greening.

मत्स्य पालन क्षेत्र को हरा-भरा करने के लिए केंद्र ने कहा कि मत्स्य पालन क्षेत्र को हरा-भरा करने के लिए प्रतिबद्ध है।

# Kerala fishermen have walked the green talk: Union joint secy

Kochi: Local fisher groups in Kerala have set an example by taking efforts to reduce fuel emissions in fishing boats by moving to natural gas, said Sagar Mehra, Union joint secretary, fisheries.

"Similar initiatives are being adopted in Gujarat and

use gas emission. India's fishing sector has a low impact. However, the country will mobilize support to transform the sector and tackle the environmental issues," he added.

The session saw experts stating that the sea-level rise was alarming for the sector and technological innovations were needed to reduce greenhouse gas emissions.

Mehra said that Prime Minister Narendra Modi's Panchamrit (five promises) aims to increase the non-fossil energy share to 500 GW by

2035 from India, Sri Lanka, Bangladesh, Maldives and Thailand besides industry players from across the world attended the brainstorming session.

"In order to achieve decarbonisation in the fisheries sector, the fishing ecosystem as a whole should be taken into account, instead of limiting to fishing fuel," said Commodore Debesh Lahiri, executive director of the National Maritime Foundation (NMF).

Attended by around 250 participants from 30 countries, the five-day symposium organized by the BOBP-IGO, the National Fisheries Inven-

Rising sea levels: Committed to greening fisheries sector, says Centre

Kochi, Feb 17 (IANS): In the wake of the rise in sea surface temperature and level, the Centre has signalled making ambitious deliberations on greening the fisheries sector.

Sagar Mehra, Joint Secretary to Fisheries, Government of India, said the Centre is on a path to make plans to address climate change and take measures for greening the sector to ensure that the sector is on a path for sustainability.

"The country would go for appropriate innovative technologies required for greening the fisheries sector," said Mehra, while speaking at a session on greening the fisheries sector at the international symposium on innovations in fishing technologies held here.

## Government to Take Efforts on Greening India's Fishing Sector By Shifting Petrol to Natural Gas

In the wake of the rise in sea surface temperature and level, the Centre has signalled making ambitious deliberations on greening the marine fisheries sector.

Sagar Mehra, Joint Secretary to the Department of Fisheries, said India is committed to making plans to address climate change and take measures for greening the marine fisheries sector to ensure that the sector is on a path for sustainability.

"The country would go for appropriate innovative technologies required for decarbonisation of the sector," said Mehra, while speaking at a session on greening the fisheries sector at the international symposium on innovations in fishing technologies held here.

Citing Prime Minister Narendra Modi's Panchamrit (five promises) to increase the non-fossil energy to 500 GW by 2035 and to ensure that 50 per cent of the energy requirements come from renewable energy, Mehra said the country is determined to set the stage for using renewable energy in the fisheries sector.

"In terms of global greenhouse gas emission, India's fishing sector has a low impact. However, the country will mobilise support to transform the sector and tackle the environmental issues," added Mehra.

He pointed out that Kerala has shown an example in this regard, with some fishermen groups making efforts to greening fishing vessels by moving from the use of petrol to natural gas.

# International Conclave on Mainstreaming Climate Change into International Fisheries Governance and Strengthening of Fisheries Management Measures in Indo-Pacific Region

## 16-19 October 2023

**DECCAN Chronicle**  
THE LARGEST CIRCULATED DAILY IN SOUTH INDIA  
CHENNAI, OCT. 15

### Climate-resilient fisheries global conclave at Mahabs on Tuesday

DC CORRESPONDENT  
CHENNAI, OCT. 15

A three-day international conclave on Mainstreaming Climate Change into International Fisheries Governance will get underway at Mahabalswaram on Tuesday. The event will be inaugurated by Union fisheries minister Parthottam Rupala at 9 am at Wolcotts hotel, at Konesar palai beach. Organized by the Food and Agriculture Organization (FAO),

farmers and high-rank government officials from regional fisheries bodies in Indo-Pacific region covering countries will attend the conclave.

Union minister of state L. S. again will deliver a special address and Dr. Abdulhalim L. will deliver the keynote address on India's developmental, food and policy initiatives for climate resilient marine fisheries to be created in the conclave.

Seafood exports hit record high last year: Union Minister

Union Minister of Fisheries, Dr. Parthottam Rupala, today said that the value of India's seafood exports hit a record high last year, reaching over \$10 billion. He said that the government is committed to strengthening the fisheries sector and ensuring sustainable growth. He also mentioned that the government is focusing on improving the infrastructure and logistics for seafood exports to meet the growing demand in international markets.

### 'Fish exports up due to central govt initiatives'

Tues News Network

Chennai: Fish exports, shrimp production and exports have doubled in the country in the last nine years due to the thrust given to the sector by the central government, said Union minister for fisheries, animal husbandry and dairying, Parthottam Rupala, here on Tuesday.

Speaking after inaugurating an international conclave on 'mainstreaming climate change into international fisheries governance and strengthening of fisheries management measures in Indo-Pacific region', he said, 'Soon after BJP came to power, a new department was formed, and ministers appointed,' he said. 'Fish production in the country, which was only 95.78 lakh tons during 2013-14, rose to 121.37 lakh tons in 2022-23. The annual shrimp production was 1.22 lakh tons in 2013-14 period, but touched 1.84 lakh tons in 2022-23. Simultaneously, annual shrimp exports reached a revenue of \$1.4 billion in 2022-23.'

U.S. and Canadian governments have been successful in their efforts to reduce the number of people who are infected with HIV and who die of AIDS. The number of new HIV infections in the United States has declined by 25 percent since 1991, and the number of deaths has declined by 30 percent since 1995. In Canada, the number of new HIV infections has declined by 15 percent since 1991, and the number of deaths has declined by 20 percent since 1995. These successes are the result of a combination of factors, including increased awareness of the risks of HIV infection, improved access to HIV testing and counseling, and the availability of effective antiretroviral therapy. However, there is still much work to be done to prevent the spread of HIV and to care for those who are infected. In the United States, the Centers for Disease Control and Prevention (CDC) estimates that there are approximately 400,000 people living with HIV, and that about 25,000 people die of AIDS each year. In Canada, the Canadian Centre for Disease Control (CCDC) estimates that there are approximately 60,000 people living with HIV, and that about 10,000 people die of AIDS each year. The CDC and CCDC are working to reduce the number of new HIV infections and to improve the lives of people living with HIV. They are doing this by providing education and counseling, testing and counseling, and antiretroviral therapy. They are also working to reduce the stigma associated with HIV and AIDS. In the United States, the CDC has launched a national campaign to reduce the number of new HIV infections. This campaign is called "Don't Drink and Drive, Don't Do It." It is a reminder that just as drinking and driving is dangerous, so is having sex without protection. The CDC is also working to improve access to HIV testing and counseling. They are doing this by providing free testing and counseling at community-based organizations, and by providing home-based testing and counseling. In Canada, the CCDC is also working to improve access to HIV testing and counseling. They are doing this by providing free testing and counseling at community-based organizations, and by providing home-based testing and counseling. The CDC and CCDC are also working to reduce the stigma associated with HIV and AIDS. They are doing this by providing education and counseling, and by providing antiretroviral therapy. Asian Minister of Fisheries Pariphatra Phiphat requested the global conference on maintaining sustainable fisheries in the Indo-Pacific Ocean region is a new international fisheries governance in Mahabakuram at 9 a.m. on Sunday. "The Indo-Pacific Ocean region is a shared responsibility of all the countries sharing the border, making it a sustainable habitat for all living creatures," said the Minister.

He further mentioned that PM Narendra Modi has been using steps to curb COVID-19.

Leading finance ministers, policymakers, and high-ranking government officials from the Asia-Pacific region (covering 30 countries) attended the meeting, including Bangladesh, Maldives, etc. new development, research, and policy initiatives for climate action may be taken were discussed during the meeting of the session.

Climate-Resilient Fisheries Development

Organized by the Food and Agriculture Organisation of the United Nations (FAO) in collaboration with the Department of Fisheries, Govt. of India, and the Bay of Bengal Programme Inter-Governmental Organisation (BOBP-IGOI), the conference seeks to develop policies for climate-resilient fisheries management and sustainable livelihoods of coastal communities in the face of climate change and other national fisheries governance.

### Coastal communities most vulnerable to climate change, say experts

Chennai, Oct 18 (UNI) From flooding to shoreline changes to disease outbreak, a barrage of challenges is posing a serious threat to the coastal lives, according to experts on climate change. A brainstorming session on India's preparedness for adapting to climate change in marine fisheries, held at the ongoing international climate conclave on marine fisheries, on Wednesday underlined that coastal communities are the most vulnerable to climate change. Increased frequency of cyclones and subsequent storm surges and coastal flooding are causing socio-economic insecurity among the coastal people, it observed.

## THE TIMES OF INDIA

Berhampur: Berhampur University (BU) on Tuesday signed a memorandum of understanding (MoU) with the Bay of Bengal Programme Inter-Governmental Organisation (BOBP-IGO), a regional fisheries body, mandated to assist the increasing livelihood opportunities for fisher folk in the Bay of Bengal region for collaborative research in the field of marine ecology.

The Bay of Bengal Programme Inter-Governmental Organisation (BOBP-IGO), set up in 2003, is a regional fisheries advisory body (RFAB) with Bangladesh, India, Maldives and Sri Lanka as its member countries. The Organisation evolved from the erstwhile Bay of Bengal Programme of the Food and Agriculture Organization of the United Nations (FAO) founded in 1979.

The BOBP-IGO is mandated to enhance cooperation among its member-countries as well as other countries and organizations in the Bay of Bengal region and provide technical and management advisory for sustainable fisheries development and management.

BOBP-IGO is committed to contributing towards accelerating the transformation of the fisheries sector of this region towards real-time, evidence-driven, and ecosystem-based management, leveraging our global knowledge networks and effective partnership with the national governments and their constituent research and academic institutions.
